

Ottocast MirrorTouch Car Adapter

User Manual

Warning

- Please read all instructions and warnings before using this product.
 - For your safety and the safety of other road users, and to comply with the traffic laws of your country, please do not watch videos while driving.
 - Do not store this product in a high temperature, strong light, or strong magnetic field environment, and avoid placing it in other harsh environments.
 - Avoid strong physical impact, including hitting, stepping on, or squeezing.
 - Avoid powering the product with a power source that exceeds the rated voltage of the product, as this may cause the product to malfunction.
 - Do not disassemble this product, as it will void the warranty.
 - If the consumer violates the product explanation and uses it improperly, they will bear all the consequences, and the company will not bear any legal responsibility.
- * **This product is only compatible for vehicles with factory wired CarPlay.**
- * **The information in this manual is subject to change without prior notice.**

Overview

■ Converts Factory Wired CarPlay to Wireless CarPlay.

■ Screen mirroring for iOS/Android.

*** It supports Bi-Directional control of the mobile phone screen on the car screen.**

Check the adaptability

■ How to check for factory wired CarPlay of vehicles.

Plug in the iPhone into the car's USB port using the original factory cable. If the following notification pops up on the car, it means your car has built-in CarPlay.

- * iPhones must run iOS 10 or a later version.
- * If you are still unable to determine whether your car supports wired CarPlay, please contact your car dealer for help.

Hardware Interface

- * Where this diagram is inconsistent with the product, the product shall prevail.

① USB-A Male

Used for power supply and data transmission.

② Type-C Female

It is used for power input and supports the input from a charger that complies with the PD protocol.

* Each time the charging is disconnected, iOS Mirror / Android Mirror will be restarted once.

③ Hidden button

Long press for 10 seconds to clear all data and restore to factory settings.

④ LED

- Blue bright light: Power On
- Blue bright light: Auto communication succeeded
- ✦ Green flicker: Mobile phone connecting...
- Green bright light: Mobile phone connected successfully
- ✦ Red-green alternating flashing: Firmware Updating...
- White bright light: Firmware Update Complete
- ✦ Red flicker: Unexpected Firmware Update
- White bright light: Reset Complete
- Red bright light: P2P Mode

● Always on

✦ flashes

✦ Alternating colors

⑤ Type-C Male

It is used for power supply and data transmission, and supports the output of the PD protocol with a maximum of 27 watts.

⑥ USB-A to C Adapter

Use this for cars equipped with only Type-C ports.

Start

■ Install

- * Plug the adapter into your vehicle's USB port designated for wired Apple CarPlay (if multiple ports are present).

■ User Interface

Back to factory menu

IOS Mirror

Display Mode

(Adjust screen ratio, tap to cycle: **Default** → **Fit** → **Stretch**)

iOS Home button...

Quickly switch to CarPlay.....

Touch Orientation Adjustment

(When the screen moves in the opposite direction of your touch, click this button once to adjust)

Android Mirror

Display Mode

(Adjust screen ratio, tap to cycle: Default → Fit → Stretch)

Android Home button...

Video repair

(If the video fails to display, use this button to fix it)

How to Connect Wireless CarPlay

1. Tap the CarPlay icon.

2. Turn on the Wi-Fi and Bluetooth on your phone, then pair it with the Bluetooth device named **[CAR-XXXX]**, and agree to all requests on your phone.

3. Successfully connected to CarPlay (and there is no need to repeat the pairing steps the next time it starts).

■ Switch Devices

1. Remove the adapter from the car.
2. Turn off the WiFi and Bluetooth of the current phone.
3. Connect the adapter to the car and start connecting Bluetooth.

* **Reconnect mechanism:** This adapter supports storing two phones, and by default, it prioritizes reconnecting to the last used phone. If the reconnection timeout (15-30 seconds) occurs, it will automatically connect to the other phone.

* You can set the CarPlay icon as the default function in the system settings, and you can directly enter this function every time you turn on the device.

Screen Mirroring for iOS Setup

1. Connect the product to the car and the mobile phone, and click the iOS Mirror icon.

2. Follow the instructions to set up the phone properly.

*** Please note:** The touch function can only be activated after the settings are made!

3. The connection is successful.

Screen Mirroring for Android Setup

1. Connect the product to the car and the mobile phone, and click the Android Mirror icon.

2. Important Notes for Android Mirror.

3. The connection is successful.

* Supported models:

This function is only supported on mobile phones with the [DisplayPort] function. Please scan the QR code for inquiry.

* Regarding the DESK mode: Some mobile phones come with the DESK mode pre-installed, and the DESK mode will be automatically activated when connected to screen mirroring. If you do not need the DESK mode, you can manually exit this mode. Please refer to the mobile phone instruction manual for the specific exit path.

Instructions for upgrading and reporting issues for iPhone users

■ Firmware Upgrade

1. Upgrade in CarPlay connected state.

1.1. Enter `http://192.168.1.101` in the browser.

1.2. Press the upgrade button.

2. Upgrade when CarPlay is not connected.

2.1. Connect to [CAR-XXXX] on your mobile phone's WiFi.

2.2. The password is 88888888. Press the enter button.

2.3. Enter http://192.168.1.101 in the browser.

2.4. Press the upgrade button.

- * Please do not turn off the power during the update process.
- * After the upgrade is completed (with the LED in color white), please unplug the adapter.
- * After updating, please re-pair your phone.

■ Reporting issues

1. Fill in the table and submit.

1

Car brands	Volkswagen
Car models	Passat
Car years	2023

 Report

2. Copy the case number.

Instructions for upgrading and reporting issues for Android phone users

1. Connect the product to a 5V car charger (alternatively, a portable power bank or power adapter may be used as substitutes for vehicle power supply).

2. Press the hidden button with a paper clip (not included) for over 5 seconds until the light turns red to activate P2P mode.

3. Find the WiFi Direct (or WLAN Direct) function on your android phone.

The paths to enter the WiFi Direct function vary slightly among different mobile phones. Take the Google Pixel 6Pro as an example: Go to **Settings** → **Network&internet** → **Internet** → **Network preferences** → **WiFi Direct**

4. Tap **[CAR-XXXX]** in WiFi Direct menu.

5. Wait until the connection is successful.

6. Enter "192.168.1.101" in the browser of the smartphone.

7. If there is an available update, click "Update".

- * Please do not turn off the power during the update process.
- * After the update is completed (with the LED in color white), please unplug the adapter.
- * After updating, please re-pair your phone.
